#### **INTRODUCTION**

The black bear harvest report presents black bear harvest and hunter effort trends across the state of Utah, based on data collected from bear hunters and compiled by the Utah Division of Wildlife Resources (Division). This report represents the black bear portion of Federal Aid Project W–65–M, segments 58 and 59, grant agreement periods October 1, 2009 through September 30, 2010 and October 1, 2010 through September 30, 2011, respectively. This Federal Aid project covers the 2010 hunting season. This report presents black bear statewide trends since the 1960s, as well as population trend indicators.

For purposes of effective management, the state of Utah is divided into 30 wildlife management units, which are the same for all hunted species. For black bears, some of these units were combined into larger units in order to provide hunters more opportunity, and a few units were open to pursuit only. Hunt units were managed through a limited entry permit system, where a hunter had to apply for and draw from a pool of limited permits. The hunter was allowed to hunt the entire season, or until the permit was filled. Applicants who drew a limited entry permit were required to wait two years before applying for another permit. The season limit was one bear, and females with cubs, or cubs, were not legal to harvest. An unlimited number of pursuit only permits, valid on any open unit statewide, were also available.

A total of 22 management units were open for black bear hunting during the 2010 spring and fall hunting seasons. The spring hunting season opened April 10, 2010 and closed May 30, 2010, except for 6 units that closed June 6, 2010 (Cache/Ogden/Morgan Rich/East Canyon; Central Mountains, Nebo; Central Mountains, Manti-South; Chalk Creek/Kamas/North Slope, Summit; Wasatch Mountains, Currant Creek, Avintaquin; Wasatch Mountains, West). The first half of the fall hunting season opened August 28, 2010 and closed September 30, 2010, and the second half of the fall hunting season opened November 1, 2010 and closed November 30, 2010.

Black bear pursuit was open in all 22 units during 2010, within specified dates. The spring pursuit season opened April 10, 2010 and closed May 30, 2010, except for 6 units that closed June 6, 2010 (Cache/Ogden/Morgan Rich/East Canyon; Central Mountains, Nebo; Central Mountains, Manti-South; Chalk Creek/Kamas/North Slope, Summit; Wasatch Mountains, Currant Creek, Avintaquin; Wasatch Mountains, West). The fall pursuit season opened November 1, 2010 and closed November 30, 2010. The summer pursuit season opened July 10, 2010 and closed August 8, 2010 in all but 3 units. These 3 units, Book Cliffs, La Sal (La Sal Mountains and Dolores Triangle), and San Juan, were closed to general black bear pursuit and only pursuers who applied for and obtained a restricted pursuit permit were allowed to pursue in 1 of those units. Restricted pursuit permits were valid for either an early (July 8 – July 22, 2010) or a late (July 29 – August 12, 2010) season in 1 of the 3 restricted units. These restricted pursuit permits could also be used to pursue bears in any non-restricted unit during the spring, summer, and fall seasons.

#### **METHODS**

All successful hunters were required to have their bear checked by a Division office or officer within 48 hours of harvest. At that time, tooth and hair samples were collected, and a permanent tag affixed. Bear harvest information was also collected at that time. Teeth were sectioned and

cementum annuli counted by Matson's Lab in Milltown, Montana, to estimate age of harvested bear. Survival rates were estimated using the Chapman-Robson estimator. Ages for bears harvested during the fall season covered in this annual report are not available at the time of publishing. Therefore, mean ages and survival rates are calculated using ages from bears harvested in the spring and the previous fall. Age data for depredation and other mortality are also not available at the time of publishing, so mean ages are calculated using ages from bears harvested from July of the previous year to June 30 of the current year. Age data and survival, beginning with 2006, were adjusted in the 2007 report to reflect this change in methods.

In past years, a black bear harvest mail questionnaire was sent each fall to all bear permit holders. This questionnaire was used to obtain hunter effort information from those who did not harvest a bear. Beginning with the 2000 bear season, this questionnaire was discontinued. As such, numbers of hunters afield each season and bears per hunter were no longer calculated. For the 2010 spring and summer pursuit seasons, both an Internet survey and a telephone survey were conducted to obtain bear pursuit data. No data was collected for the fall pursuit season in 2010.

Harvest data from depredating bears, or bears involved in human safety incidents, were taken from damage reports received from USDA-APHIS Wildlife Services and from bears taken by Division personnel. Livestock operators could kill damaging bears and were required to have the carcass checked by a Division officer within 48 hours. Harvest information was collected at that time.

#### **RESULTS**

In 2010, a total of 372 limited entry black bear permits were issued, which included 22 conservation and convention permits. Hunters harvested 165 bears, 101 of which were taken in the spring and 64 in the fall. 44% of permits were filled, which was the same as it was in 2008 and 2009. The average age of bears harvested in 2010 was 6.5 and estimated adult survival was 82%. The percent of females in the harvest increased from 31% in 2009 to 33% in 2010, which was still below the maximum percentage of females allowed in the harvest in order to maintain a sustainable population. A total of 53 bears were killed as a result of depredation or other mortality.

460 black bear pursuit permits were sold in 2010. 100 of these permits were permits sold through a drawing system and were valid for one restricted summer pursuit unit/season in addition to all other unrestricted units and seasons. 326 pursuers went afield during the spring pursuit season. 185 pursuers pursued in unrestricted units during the summer pursuit season and 63 pursuers pursued in restricted units during the restricted summer pursuit seasons. During the spring pursuit season, pursuers treed 0.41 bears per day, while during the summer pursuit season, pursuers treed 0.35 bears per day.

More detailed information describing the 2010 black bear harvest and black bear harvest trends can be found in the following tables and figures.

Statewide black bear historical harvest statistics, Utah 1967–2000.

| Statewide total                              | 236    | 119  | 17           | 372   | 72     | 29        | 38   | 26      | 165     | 44             | 33      | 6.5             |

<sup>\*</sup> Mean age of harvest is based on bears harvested fall 2009 and spring 2010.
\*\* Total conservation permits includes 1 statewide conservation permit.

Adult black bear survival estimated with Chapman-Robson estimator, Utah 1996-2010.

|      |     | Adult        | 95% confidence |
|------|-----|--------------|----------------|
| Year | n   | survival (%) | interval       |
| 1996 | 83  | 79.4         | 75.4–83.4      |
| 1997 | 60  | 78.0         | 73.0-83.0      |
| 1998 | 54  | 77.7         | 72.4–83.0      |
| 1999 |     | 82.0         | 77.7–86.2      |
| 2000 | 83  | 80.9         | 77.2–84.6      |
| 2001 | 98  | 81.5         | 78.2–84.8      |
| 2002 | 130 | 81.2         | 78.3–84.1      |
| 2003 | 68  | 83.6         | 80.0-87.2      |
| 2004 | 115 | 82.4         | 79.5–85.4      |
| 2005 | 58  | 83.6         | 79.7–87.5      |
| 2006 | 62  | 85.0         | 81.5–88.5      |
| 2007 | 109 | 80.2         | 76.8–83.5      |
| 2008 | 99  | 81.0         | 77.7–84.4      |
| 2009 | 142 | 81.0         | 78.2-83.9      |
| 2010 | 144 | 81.9         | 79.2–84.6      |

<sup>\*</sup> Survival rates since 2001 are estimated using ages from bears harvested in the spring and the previous fall.

In 2010, general season summer/fall pursuit does not include pursuit activity of any pursuers who obtained a restricted summer season pursuit permit.

Black bear pursuit statistics during restricted summer pursuit seasons, 2010.

| Year | Permits sold | n  | Pursuers | Bears / pursuit-day | Bears / pursuer |
|------|--------------|----|----------|---------------------|-----------------|
| 2010 | 100          | 70 | 63       | 0.75                | 4.9             |

Spring 2002 includes summer/fall 2001 and spring 2002. Spring 2003 includes summer/fall 2002 and spring 2003. Beginning with 2007, summer/fall only includes summer season.

Statewide spring black bear pursuit statistics by unit / subunit, Utah 2010.
